

Monster Hexaflexagon

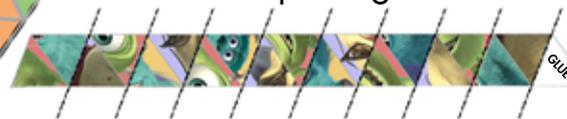

A hexaflexagon is a hexagon shaped piece of paper that can be "flexed" to reveal many different faces. Have an adult help you cut and glue together your own **Monsters, Inc. 3D** hexaflexagon and see how many characters you can find!

1: Cut out the strip to the right on the dotted line.

2: Fold it down the middle and glue together the blank insides, forming a long strip like this with pictures on the outside.

3: Fold the strip along these lines:

4: Fold along the folds to make a strip that looks like this:

5: With the "front" side facing up, fold it away from you on this line:

6: Fold the strip away from you once more.

7: Fold the tab over and glue the "glue" tabs together.

8: To "flex" press into a three-sided shape and then pull open the center.
