

# Happy Summer Magic Squares

Grades Kindergarten and Up!

## Thank you for downloading!! ☺

These fun, seasonal puzzles will allow your students to match the correct summer word to the scrambled letters that fit it or match the picture to the correct word. There are 12 or 24 pictures or words in each puzzle. You'll have to determine which ones best suit your students' needs.

**Preparation and Storage:** You will need to print off the desired number of copies. These work well for centers, individual fun, or whole group. Cut the magic squares out and put them into plastic baggies for students' use. I put each set in its own plastic baggie. Then I put all of these baggies and one original sheet in a manila envelope with the name of the activity on the front. This way I have the answer key and all materials readily available.

**Directions to Play:** Give students the cut-up magic square sheet. Tell them they need to put the square back together. The first time you have the students complete one of these, I suggest drawing out a 3x3 or 4x4 square on the board so they understand what it should look like. You can also give them the hint (because I have found some do not figure this out!) that the graphics will all be facing the correct direction.

**Correcting Student Work:** To easily check a student's completed work, keep an original copy of the magic square sheet they are working on. This way you can immediately check to see if the graphics are in the correct order or not.

Still not sure how Magic Squares work? Check out this [blog post](#)!
